

Breeder: Bretagne Plants Innovation

Registration : 2010 (France) ; Cross breeding : Alaska x 88F45.6

Representative in France : Elorn Plants

SYNERGY is Elorn Plants' flagship export variety. Thanks to its high yields, hardiness and storage capacity, **Synergy is the ambassador of Elorn Plants know-how on the export market.**

**Export
consumption**

**Exceptionnal
yields**

**Excellent
storage capacity**

**Low water & nitrogen
requirements**

**Beautiful
presentation**

Characteristics of the plant and tubers

Middle size

Semi-erect or spread growth habit

Type main crop

Flower : white

Shape large long oval

Regularity : 7 (regular)

Eyes : 7 (superficial)

White flesh

Yellow skin

Agronomic characters

Maturity group 7 (Mid early)

Share of big tubers 9 (strong to very strong)

Dormancy 6 (mid long)

Incubation 5 (mid sensibility)

Storage ability 7 (good)

Culinary characters

Culinary group A

Dry matter content 16 -17%

After-cooking blackening very light

Disintegration

Sensitivity to disease

Foliage mildew **Sensitive**

Tuber mildew **Low sensitivity**

Virus Y **Mid sensibility**

Virus A **Sensitive**

Virus X **Resistant**

Leafroll virus **Low sensitivity**

Common scabies **Low sensitivity**

Nématode Ro 1-4 **Sensitive**
